💼 Work Experience

Front-end developer at ExecuteIT   May 2022 – April 2023

- Translate UI/UX design wireframes to actual code by developing websites, applications, and landing pages with a responsive mobile-first approach

- Improving, maintaining, and optimizing websites by increasing their loading speed, debugging, testing for usability on various devices, and writing reusable code

- Updating client's old websites to a more modern and up-to-date design by using web design techniques such as Styled Components, Tailwind, TypeScript, and React

- Implementing various features to websites and applications to improve UX, custom form validation, UI Components such as Accordions, i18n Internationalization, etc.

- Collaborated with other developers and designers to create interactive applications and websites and to ensure successful, on-schedule development and delivery of applications

🧠 Skills

`Html`   `CSS`   `JavaScript`   `React`   `Github`   `TypeScript`
